Frontend Developer with 3 years of experience in creating scalable and intuitive web interface. Specialized in developing reusable components and clean code using technologies such as React, Next.js, TypeScript, CSS, Material UI, and Tailwind CSS. Adept at problem-solving, continuous learning, and committed to high-quality teamwork to improve product performance.

PROFESSIONAL EXPERIENCE

2025/02 - Present — **Frontend Developer**, WeAreContent - Colombia

- **Designed and developed reusable components with Vanilla JavaScript, optimizing workflows and reducing delivery times.**
- Implemented a modular, scalable architecture, improving legacy code maintainability by 80%.
- Led the frontend migration from Yii + JavaScript to a modern React-based architecture, enhancing performance and scalability.
- **Spearheaded the standardization of API contracts with the backend team, reducing errors and accelerating feature development.**
- Developed documentation and code structuring strategies to improve readability and streamline onboarding.
- Optimized workflows through Gitflow implementation and environment automation, reducing development cycle conflicts
- **Technologies:** HTML, CSS, Yii, PHP, React, Vite, Tailwind, Shadcn UI, Docker, JavaScript, TypeScript, Trello, GitHub.

2023/03 - 2025/02 — **Frontend Developer**, Coastal Insight Consulting - USA, Miami

- Developed responsive UI using Material UI and CSS, ensuring accessibility and SEO optimization.
- Established efficient integration points with RESTful APIs, ensuring seamless data synchronization between frontend and backend in distributed environments.
- Implemented a modular strategy that allows the frontend to scale while maintaining Design System integrity.
- Drove improvements in collaborative workflows with the backend team, contributing to the automation, maintenance, and scalability of over 8 active projects.
- **Technologies:** Next.js, React, Node.js, JavaScript, TypeScript, Material UI, HTML, CSS, Git.

Universidad de Falcón (UDEFA) - Falcón, Venezuela. *Electronic Engineering*, 2019.

CONTINUING EDUCATION

2017 - 2019 - **English Holistic System** - Alpha Learning

2022 - 2023 - **Responsive Web Design** - FreeCodeCamp - Online

2022 - 2023 - **Frontend Developer** - Platzi - Online

2023 - **Algorithms and flowcharts** - Platzi - Online

2022 - Present - **Full-Stack Web Development** - Udemy Dr. Angela Yu - Online

2024 - **React with TypeScript** - Platzi - Online

PROJECTS

Present - ShareIT - <https://share-it.tech/> - Buenos Aires, Argentina

- Website developed with Astro for the ShareIT community, focused on conveying its values and sharing articles and useful resources written by the community itself.
- Led and coordinated the technical and strategic development of the project, optimizing performance and scalability.

2025 - **Blue Way Transportation** - <https://bluewayisbetter.com/> - Miami, USA

Frontend, Nextjs.

- Web application for coordinating non-emergency medical transportation.
- Designed and structured reusable components for the ride-booking section using Next.js and Material UI, prioritizing accessibility.
- Integrated a global context system for user data persistence during the booking flow.

2025 - **C-Core** - Miami, USA

Frontend, Nextjs.

- Internal administrative management web app with an intuitive, scalable, and high-performance dashboard.
- Led the frontend development, defining a modular and maintainable architecture to facilitate scalability and collaborative work.
- Designed and implemented the entire UI using Next.js, Material UI, and Tailwind CSS, focusing on visual consistency and

responsiveness.

- Integrated a cookie-based data persistence system, reducing unnecessary re-renders and improving UX during long sessions.
- Managed global state with Context API, improving data synchronization and component update efficiency

LANGUAGES

- English: Advanced (C1) - EF SET Certified.
- Spanish: Native (C2)
- Japanese: Basic (A1)

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, NoSQL (MongoDB).

Frameworks & Libraries: React, Next.js, Astro, Zustand, Vitest, Material UI, Shadcn UI, Tailwind CSS, Node.js, Express.js.

BaaS Platforms: Supabase, Firebase.

Tools: Vite, Git, GitHub, Docker, Trello.

Soft Skills: Communication, teamwork, adaptability, emotional intelligence, autonomy.
