Frontend **Software Developer with 3+ years** of experience building scalable web applications using React, Next.js, and TypeScript. Experienced in component-driven development, frontend architecture, performance optimization, and API integration. Skilled in modernizing **legacy applications, working with microfrontend architectures, and delivering reliable solutions in collaborative environments.**

PROFESSIONAL EXPERIENCE

2026/03 - Present — **Frontend Software Developer**, AcidLabs / Cencosud - Santiago, Chile.

- **Developed new features and enhancements on top of an existing microfrontend architecture,** integrating content via a CMS while maintaining the project's standards for modularity and scalability.
- **Implemented and validated analytics tracking through the Data Layer, ensuring consistent event reporting and reliable data collection.**.
- Use of AI tools as part of the development workflow for **code analysis and refactoring, debugging, test generation, and technical documentation.**
- **Actively participated in load testing and performance audits**, identifying bottlenecks and applying key frontend optimizations to support high traffic volumes.
- **Collaborated in the production deployment process**, monitoring system stability and troubleshooting production issues and contributing to timely incident resolution in live environments to mitigate business impact.
- **Stack:** Nextjs, React, Tailwind, CMS, Microfrontends, Shadcn UI, Docker, JavaScript, TypeScript, Jira, GitHub, Coralogix, DataLayer, Jest, Testing Library.

2025/02 - 2026/03 — **Frontend Developer**, WeAreContent - Bogota, Colombia

- **Designed and developed reusable components with Vanilla JavaScript, optimizing workflow and reducing delivery times.**
- **Refactored legacy frontend code into a modular architecture**, significantly improving maintainability and simplifying future feature development..
- **Frontend migration from Yii + JavaScript to a modern React-based architecture,** improving performance, scalability, and developer experience.
- **Proposed and led the standardization of API contracts together with the backend team, achieving more efficient integration and accelerating the development of new features.**
- Developed documentation and code structuring strategies, increasing readability and reducing onboarding time for multidisciplinary teams.
- **Stack:** HTML, CSS, Yii, PHP, React, Vite, Tailwind, Shadcn UI, Docker, JavaScript, TypeScript, Trello, GitHub, Cursor.

2023/03 - 2025/02 — **Frontend Developer**, Coastal Insight Consulting - Miami, USA

- Developed responsive UIs using Material UI and CSS, ensuring accessibility and SEO optimization.
- Established efficient integration points with RESTful APIs, ensuring smooth data synchronization between frontend and backend in distributed environments.
- Implemented a modular strategy to scale the frontend while maintaining the integrity of the Design System.
- Contributed to frontend optimization and codebase improvements, supporting maintainability and long-term application scalability..
- **Stack**: Next.js, React, Node.js, JavaScript, TypeScript, Material UI, HTML, CSS, Git.

Universidad de Falcón (UDEFA) – Falcón, Venezuela. Electronic Engineering, 2019.

CONTINUING EDUCATION

2017 - 2019 - **English Holistic System** - Alpha Learning
2022 - 2023 - **Responsive Web Design** - FreeCodeCamp – Online
2022 - 2023 - **Frontend Developer** - Platzi – Online
2023 - **Algorithms and Flowcharts** - Platzi – Online
2022 – Present - **Full-Stack Web Development** - Udemy Dr. Angela Yu – Online
2024 - **React with TypeScript** - Platzi – Online
Present – Python Course – Online.

PROJECTS

2024 / Present - ShareIT - https://share-it.tech/ - Buenos Aires, Argentina
Software Developer

- Site developed with Astro for the ShareIT community, focused on transmitting values and sharing articles.
- Led and coordinated the technical and strategic development of the project, optimizing performance and scalability.

2025 – Blue Way Transportation - https://bluewayisbetter.com/ - Miami, USA
Frontend, Nextjs.

- Web application for non-emergency medical transport coordination.
- Designed and structured reusable components for the booking section using Next.js and Material UI.

2025 - C-Core - Miami, USA
Frontend, Nextjs.

- Internal administrative management web application with an intuitive and high-performance dashboard.
- **Led the frontend development, defining** a modular and maintainable architecture that facilitates scalability and cross-team collaboration.
- **Designed and implemented the complete interface** using Next.js, Material UI, and Tailwind CSS, prioritizing visual consistency, accessibility, and responsiveness across devices.
- I**ntegrated a data persistence system using cookies**, reducing unnecessary re-renders and enhancing user experience during extended sessions
- **Managed global state with Context API**, improving data synchronization and component update efficiency.

LANGUAGES

- English: Advanced (C1) - EF SET Certified.
- Spanish: Native (C2)
- Japanese: Basic (A1)

SKILLS

Languages: HTML, CSS, Javascript, TypeScript, NoSql (MongoDB).

Frameworks and Libraries: React, NextJS, Astro, Zustand, Material UI, Shadcn UI, Tailwind CSS, NodeJS, ExpressJS.

Architecture & Integration: Microfrontends, REST APIs, CMS Integration, Component-Driven Development.

BaaS Platforms: Supabase, Firebase.

Observability & Analytics: Coralogix, DataLayer.

AI-Assisted Development: Claude, ChatGPT, GitHub Copilot; aCode analysis and refactoring, debugging, test generation, and AI-assisted technical documentation.

Tools: Vite, Git, GitHub, Docker, Trello.

Testing: Vitest, Jest, Testing Library

Soft Skills: Communication, teamwork, adaptability, emotional intelligence, autonomy.
